Profile Summary

Motivated and self-driven Frontend Developer with a solid foundation in HTML, CSS, JavaScript, React, Tailwind CSS, and Bootstrap. Though a fresher, I have built multiple personal projects that demonstrate my ability to create responsive and user-friendly web interfaces. Strong understanding of modern web development practices, UI/UX principles, and version control with Git. Eager to apply my skills in a professional setting, contribute to real-world projects, and grow as part of a collaborative development team.

Tech Skills

Languages: JavaScript, Python

Technologies: HTML5, CSS3, React19, Tailwind CSS, Bootstrap CSS, Git, GitHub

Soft Skills

- Strong communication and collaboration abilities
- · Resilience and commitment to hardwork
- Excellent problem solving skills
- Adaptable to new challanges and technologies

Education

Gandhi National college-Bachelor's in Computer Application **MPC Junior College**- Intermediate

Sep 2022 – May 2025

April 2020 - May 2022

Certifications

Python for Beginners-Cognitiveclass.ai **React Certification**-KnowledgeGate

Projects

World Atlas – Country Information Web Application

[Live Site]

- Built a responsive, single-page web application using React.js to display detailed country data including flags, population, region, and languages.
- Integrated real-time data using a public REST API and implemented React Router for smooth navigation between pages.
- Designed a clean, accessible UI using Tailwind CSS, and demonstrated strong skills in React Hooks, component-based architecture, and API integration.
- Tools Used: React.js, React Router, REST API, Tailwind CSS, HTML, CSS, JavaScript

Responsive Portfolio Website

[Live Site]

- Developed and deployed a fully responsive personal portfolio using React.js and Tailwind CSS, featuring a clean, mobile-first UI.
- Integrated a contact form using EmailJS for real-time message delivery without a backend, and enhanced UX with toast notifications via react-toastify. Managed component state and inputs using React Hooks (useState, useRef), and hosted the project on Netlify with fast load times and continuous deployment via a live CI/CD pipeline.
- Tools Used: React.js, Tailwind CSS, EmailJS, React Hooks, Netlify
